Family Interaction Rating Scale
FAMILY INTERACTION RATING SCALE

Name of child: ___________________________ Date of birth: ____/____/_____
Name of evaluating therapist / teacher: _______________________________________________________________________________________
Name of adult being evaluated: ___________________ Relationship to child: _______________________________________________________
Date of CI surgery: ______/_____/______ side: R / L  First hearing aid fitting: ______/_____/______ side: R / L
Date of 1st CI fitting: ______/_____/______
Date of 2nd CI surgery: ______/_____/______ side: R / L
Date of 2nd CI fitting: ______/_____/______

SCORING: 0 – 2
0 = Behavior is not observable
1 = Behavior occurs occasionally
2 = Behavior occurs habitually
| * Hearing age of child |

**Communication:** Adult behavior which facilitates interaction

1. Adult acknowledges child’s contributions by nodding, smiling or somehow letting the child know that his contribution has been noted.

2. Adult responds appropriately to the child’s meaning, e.g. performs requested task and talks about it.

3. Adult refrains from talking too much, instead tries to talk as a response to the child’s contributions.

4. Adult talks about what the child is interested in, e.g. what the child is looking at or pointing to.

5. Adult uses language at a level appropriate to the child’s understanding.

6. Adult pauses often during interaction by looking expectantly at child and waiting for a contribution.

</tbody>
</table>

1. Adult enjoys interacting with child and uses interesting, lively facial expression and friendly body language.

2. Adult talks using natural gesture to make the meaning of words clearer.

3. Adult uses repetitive language in similar contexts.

4. Adult provides the child with incidental language, not restricting input to only words and phrases directly related to current task.

5. Adult rewards the child for trying to talk by imitating sounds made by the child.

6. Adult provides the child with interesting, contingent, simple sounds and words possible for the child to recognize and imitate.

1. Adult gains child’s attention at start of activity through good use of materials, voice and expression.

2. Adult sustains child’s interest and participation in activity by being creative and making session exciting.

3. Adult paces the activity appropriately so that the child can join in.

4. Adult, whenever possible, allows and encourages the child to try to do things independently.

5. Adult realizes the importance of checking previously learned items to support child learning.

6. Adult uses opportunities, as they arise, to develop concepts, e.g. color, size, texture.

1. Adult involves child in routine household activities, e.g. setting the table, watering plants.

2. Adult sings songs and says rhymes with child.

3. Adult routinely looks at books/photos with the child, e.g. each night before sleep.

4. Adult collects and uses props (toys, pictures) to make meaning of words clearer to the child.

5. Adult takes child on outings, however simple, to widen child's knowledge and experience of the world.

6. Adult shares information learned in guidance sessions with other family members.

1. Child imitates words where syllable is repeated, e.g. 'dada', 'mama', 'woof woof', 'bye bye.'

2. Child imitates commonly used words, names, short phrases.

3. Child vocalizes along with adult, joins in songs and rhymes.

4. Child shows understanding of very commonly used words and phrases by reacting appropriately.

5. Child joins in 'conversations' using intelligible words or phrases.

1. Child actively participates in activity, e.g. handles materials, tries to do some actions, e.g. pushes train.

2. Child imitates/copies actions of adult.

3. Child plays appropriately with toys, e.g. feeds the doll/pushes the car along.

4. Child waits for his/her turn, allowing adult to have a turn.

5. Child brings some ideas to play, e.g. decides to empty the dump truck’s load.

6. Child enjoys play routines, e.g. loads dump truck, pushes it to new site, empties load then goes back for new load.
